

# Reverse Alarm Controller

(Part No. GPX-RAC)

## ***Keep The Neighbours Happy and Avoid Unnecessary Noise Pollution.***

The ***Reverse Alarm Controller*** will mute the reverse alarm/buzzer if reverse gear is selected twice in quick succession.

It eliminates the need to fit complicated switches in the cab to activate or deactivate alarms/buzzers.

The RAC is idyllic for vehicles reversing in residential suburbs outside local council's standard working hours.

This compact, impenetrable and maintenance free device has the added benefit of being multi voltage (12-24VDC).

With hassle free installation the ***Reverse Alarm Controller*** is an excellent economical solution.
